

COURSE LEADER

John L. Beck, MD, QME, AME, earned

his Doctor of Medicine Degree at the University of Pittsburgh School of Medicine in Pennsylvania and completed his orthopedic residency at Duke University in North Carolina. After 24 years in private practice, Dr. Beck joined Southern California

Orthopedic/Sports Medicine Center where he specializes in reconstructive knee and shoulder surgery. He is a sought-after lecturer and author of numerous publications and papers.

Memberships (selected):

- American Academy of Craniofacial Pain
- American Board of Orthopedic Surgery
- American College of Sports Medicine
- Hughston Orthopedic Research Society
- California Medical Association

FACILITATORS

G. Davis Kloeffler, DDS, has

a private practice in San Diego, CA, limited to craniofacial pain and TMD. An AACP member for 13 years, Dr. Kloeffler is Assistant Professor at Loma Linda University School of Dentistry. He is also a Fellow of the

American and International Colleges of Dentists.

Steven R. Olmos, DDS, achieved AACP

Fellowship status in 2002. In addition to his San Diego-based TMD/orofacial pain practice, Dr. Olmos teaches a "Mini Residency" course through the Institute for Advanced TMJ Studies. He is a Diplomate of the American

Academy of Pain Management and a Fellow of the Academy of Dentistry International. He is also a distinguished international speaker.

PRACTICAL PAIN MEDICINE FOR THE DENTIST: THE BROADER SCOPE OF TMD

PRESENTED BY

JOHN L. BECK, MD

**Facilitated by G. Davis Kloeffler,
DDS and Steven R. Olmos, DDS**

Friday, March 5, 2004

Saturday, March 6, 2004

PHOENIX
AIRPORT **Marriott**

1101 North 44th Street, Phoenix, Arizona 85008
(602) 273-7373 Fax: (602) 273-7333

sponsored by the

ACADEMY OF
CRANIOFACIAL PAIN**

www.aacfp.org

TMD is vastly under-diagnosed in routine dental care. Often, it is not until the patient presents with an orthopedic disaster that the condition is discovered. In this **2-day, hands-on course** you will learn simple reflex tests that can help you screen efficiently for TMD, with or without symptoms. Foundational concepts and theories will also be discussed.

Dentists face important questions:

- Why does TMD cause systemic pain?
- What should every dentist know about pain below the jaw line?
- Are standard dental procedures for TMD diagnosis sufficient?
- Should TMD be considered when there are no dental symptoms?
- What role can – and should – dentists play in their patients' pursuit of general fitness?
- Is a cosmetic result more important than resolving disabling neurological pain?

Gain practical answers by exploring:

- The physiological significance of posture, and what TMD has to do with this important subject.
- The basic organization of the human nervous system and why TMD can impact neurological function.
- Current concepts of pain physiology, with an emphasis on dental applications for the office.
- Theories on the evolution of Chronic Regional Pain Syndrome, and how TMD might cause this clinical disaster.

AACP President:

Larry L. Tilley, D.M.D.

AACP Program Chairman:

Robert L. Talley, D.D.S.

Increase practice efficiency:

- Discover simple office examinations derived from neurorehabilitation that will enable you to diagnose TMD... *quickly and accurately!*
- Develop essential manual skills under the guidance of expert TMD practitioners by participating in practical, hands-on laboratory sessions... *a key component of this 2-day course!*

You asked! We answered!

AACP is proud to sponsor this 2-day, hands-on course that will provide dental practitioners with clinically relevant information they can put to immediate use in their practices.

As leaders of the TMD community, we are committed to meeting the need for more widespread knowledge about diagnosis and treatment of craniofacial pain, TMD and sleep disorders.

For membership information, or to find out about additional AACP-sponsored continuing education opportunities, visit us online at www.aacfp.org today!

Approximately 14 CE hours available!

AACP is an ADA CERP Recognized Provider and an AGD PACE Approved Program Provider for FAGD/MAGD Credit.
