

DETAILED REGISTRATION BROCHURE

AACP 33rd Annual International Clinical Symposium JULY 20-21, 2018

The Westin Kansas City
at Crown Center
Kansas City, Missouri

KANSAS CITY— “Midwestern Charm with Urban Panache” Welcomes you to AACFP’s 33rd Annual International Clinical Symposium, July 20-21, 2018

NEW Bonus Benefit for Registrants:

All lectures in the main scientific sessions will be videotaped and made available to all registrants after the symposium! *This is part of the Academy’s new commitment to education.*

The AACFP convenes in Kansas City, Missouri, this summer with a palpable spark of energy and a resurgent commitment to education. The Academy’s Education Committee has worked closely with the Board to revamp the educational delivery process and to ensure that the AACFP is the world leader in cutting edge education in TMD and dental sleep medicine. This year’s symposium is a reflection of that commitment. No effort has been spared to bring the best educators on the planet to Kansas City. **Prepare to be impressed!**

The Symposium’s main session features two power-packed days of compelling presentations featuring such internationally acclaimed experts as **Bill Hang, Patrick McKeown, Mark Piper, Nick Yiannios,** and **Steve Olmos**. The ideas and suggestions you gather from just one of these sessions will be more than worth your registration fee.

And don’t fail to bring your dental practice staff with you to Kansas City this summer to take advantage of the heralded ancillary programs for beginning practitioners, assistants and advanced assistants.

The ancillary programs for your staff include **Fundamentals of TMD & Treatment: Back to Basics**, designed for dentists new to the field and for dentists who want to update/review their TMJ OSA treatment protocols; the **Certified TMJ Assistant Program, Part 1**, designed to establish a foundation for dental assistants tasked with meeting the needs of TMD and craniofacial pain patients; and the **Advanced Assistants Program**, designed for experienced staff who want to better serve the needs of patients.

Add in a number of engaging networking events and the opportunity to discuss your practice needs with our internationally recognized exhibitors and sponsors, and you have the recipe for a spectacularly successful and rewarding experience in Missouri.

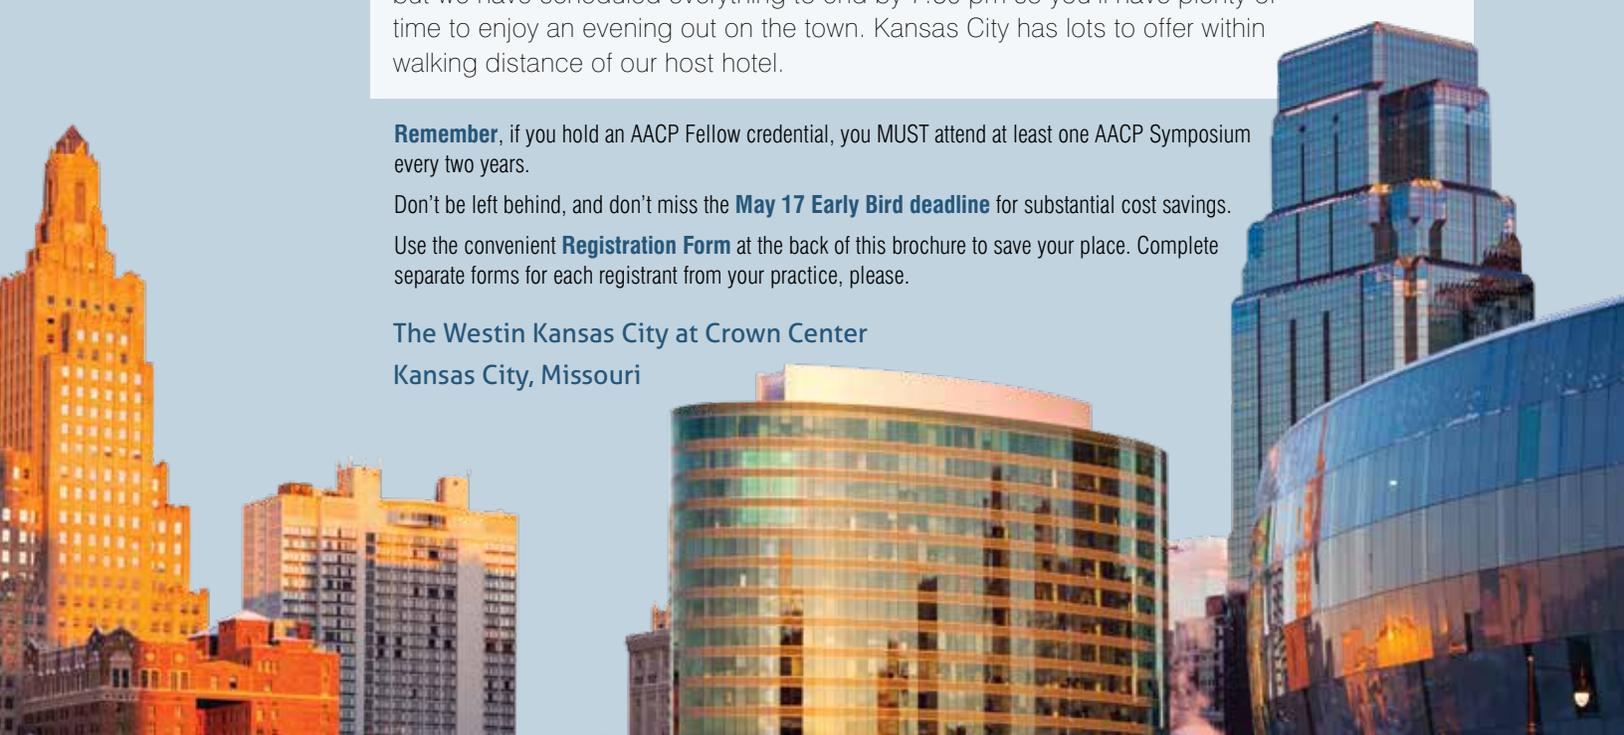

Our Convocation and President’s Reception on Friday evening are not to be missed, but we have scheduled everything to end by 7:30 pm so you’ll have plenty of time to enjoy an evening out on the town. Kansas City has lots to offer within walking distance of our host hotel.

Remember, if you hold an AACFP Fellow credential, you **MUST** attend at least one AACFP Symposium every two years.

Don’t be left behind, and don’t miss the **May 17 Early Bird deadline** for substantial cost savings.

Use the convenient **Registration Form** at the back of this brochure to save your place. Complete separate forms for each registrant from your practice, please.

The Westin Kansas City at Crown Center
Kansas City, Missouri

To make your hotel reservations, please go to:

<https://www.starwoodmeeting.com/events/start.action?id=1708156785&key=3531B98A>

OR call the hotel at (888) 627-8538 and be sure to mention the AACP Symposium.

Distinguished Speakers

William M. Hang, DDS, MSD

Early in his career William M. Hang, DDS, MSD, saw serious limitations in esthetics and function with traditional orthodontics. He learned and developed innovative techniques to protect and enhance the airway while enhancing esthetics and function. He treats all ages including children beginning at age 3, adults who have had teeth extracted for orthodontics and suffer from E.R.R.S.[™] (Extraction Retraction Regret Syndrome[™]), and OSA patients. Dr. Hang has spoken on orthodontics, facial esthetics and airway locally, nationally, and internationally. He was awarded the AAPMD Lifetime Achievement Award in 2016 for his contribution to the field of airway orthodontics.

Patrick McKeown, MA, Dip BM

Patrick McKeown, MA, Dip BM, is a world-renowned author and breathing practitioner. He was educated at Trinity College in Dublin, before completing his clinical training in the Buteyko Breathing Method at the Buteyko Clinic, Moscow, Russia. This training was accredited by Professor Konstantin Buteyko. From a young age, Patrick suffered from asthma and relied on an array of medicines and inhalers until he discovered the Buteyko Method at the age of 26, experiencing immediate relief from his symptoms. By applying the principals of the Buteyko Method, Patrick remains asthma-free since then, a feat that over 20 years of medication had failed to accomplish. In a career spanning 15 years, Patrick has since also become a bestselling author and expert on the topic of optimal breathing for improved health, well-being and fitness.

Steven R. Olmos, DDS

Steven R. Olmos, DDS, has been in private practice for more than 30 years, with the last 20 years devoted to research and treatment of craniofacial pain, temporomandibular disorder (TMD), and sleep-disordered breathing. He obtained his DDS from the University of Southern California School of Dentistry and is Board Certified in both chronic pain and Sleep Related Breathing Disorders by the American Board of Craniofacial Pain, The American Academy of Pain Management, American Board of Dental Sleep Medicine, and American Board of Craniofacial Dental Sleep Medicine. Dr. Olmos is the founder of TMJ & Sleep Therapy Centres International, with over 45 licensed locations in seven countries dedicated exclusively to the diagnosis and treatment of craniofacial pain and sleep disorders. He is currently the president of the American Academy of Craniofacial Pain.

Mark A. Piper, DMD, MD

Mark A. Piper, DMD, MD, has doctorates and certifications in General Surgery and Maxillofacial Surgery from Harvard and Vanderbilt Universities. Since 1983, he has treated over 10,000 facial pain and TMJ surgical patients at the Piper Clinic in St. Petersburg, Florida. He originated the curriculum in Foundational Occlusion at the Piper Education and Research Center, where he serves as Medical

Director. Dr. Piper belongs to numerous medical societies, and was a founding member of the American Society of TMJ Surgeons. Dr. Piper has been recipient of the Harvard Gold Medal, the Hatton Research Award from the IADR, and the Dawson Academy Lifetime Achievement Award for his medical and dental contributions to diagnosis, classification, and surgical management of patients with disorders of the TMJ.

Kelly Hibler Wells, DC

Kelly Hibler Wells, DC, is one of a handful in the Midwest specializing in craniopathy and one of the even fewer across the country specializing in dental co-treatment. She graduated from Palmer College of Chiropractic in 2005. After years of treating patients with mixed results, she developed and interest in TMD, which led her to re-visit cranial movement. She went on to complete over 120 hours in post-graduate education in chiropractic craniopathy, cranial-dental co-treatment, and myofunctional therapy. Dr. Wells is licensed in Illinois in both Chiropractic and Physiotherapy and is passionate about helping people experience health and wellness at their full genetic potential, especially in children ages 0-7.

Nick C. Yiannios, DDS

Nick C. Yiannios, DDS, received his dental degree from the University of Texas Health Science Center in San Antonio in 1993. He has been in solo private practice from 1993 to the present, and currently resides in Northwest Arkansas, home of the Walmart Corporation. Dr. Yiannios is the founder of the Center for Neural Occlusion, a teaching institution designed to proffer the importance of objective and measured diagnostics prior to the implementation of treatment. Dr. Yiannios has published several times on the novel concept of Frictional Dental Hypersensitivity (FDH), a phenomenon relating hypersensitive teeth (tooth allodynia) to occlusal and TMD issues. For years, Dr. Nick has been broadcasting patient case studies which relate to bite and TMD issues on the *DrNickDDS* channel of YouTube. Resultant of this social media presence and his publications, Dr. Yiannios routinely sees patients from all over the globe who travel to see him for his unique diagnostic skillset.

Soroush Zaghi, MD

Soroush Zaghi, MD, is a graduate of Harvard Medical School, UCLA ENT residency, and Stanford Sleep Surgery Fellowship. He is a recognized expert on the diagnosis and management of tongue-tie and restricted tongue mobility. As Medical Director of The Breathe Institute, he leads a clinical research team that is investigating the association of tongue-tie with myofascial dysfunction and craniofacial pain.

Main Scientific Session Agenda

FRIDAY | JULY 20

7:00 am – 8:00 am

REGISTRATION AND CONTINENTAL BREAKFAST

8:00 am – 8:15 am

OPENING REMARKS

Steven R. Olmos, DDS, AACP President

8:15 am – 10:00 am

You Can't Expand Your Way Out of an Antero-Posterior Problem

William M. Hang, DDS, MSD

The last twenty years has seen an explosion of interest in treating sleep/breathing issues. Dr. Michael Gelb coined the term "Airway Centric® Dentistry" focusing dentists on the airway. "Expansion" is the orthodontic profession's knee-jerk answer to OSA. Lack of forward growth of the human face outlined in Daniel Lieberman's The Evolution of the Human Head focuses on the real problem: the A-P plane. Elimination of OSA requires dealing with lateral and A-P planes of space.

Upon completion attendees should be able to:

1. Recognize lack of forward development of the face and understand its impact on the airway.
2. Understand that developing both the maxilla and mandible forward in growing children is our best preventative strategy to optimize the airway.
3. Realize that all forms of orthodontic retraction can potentially damage the airway and know alternatives to retraction exist.
4. Understand that reopening previous orthodontic extraction spaces for patients may help many of our patients eliminate OSA.
5. Understand which patients may require surgery to advance both jaws to completely eliminate OSA.

10:00 am – 10:30 am

BREAK IN THE EXHIBIT HALL

10:30 am – 12:00 pm

Tongue-tie and Myofascial Dysfunction: New Insights on a Phenotype of Craniofacial Pain

Sorouh Zaghi, MD

Restricted tongue mobility due to onkyloglossia (tongue-tie) is a common and frequently underdiagnosed cause of myofascial dysfunction and craniofacial pain. This presentation will highlight a case series of patients with compensations for tongue-tie that were successfully treated with a combination of tongue-tie surgery and therapy.

Attendees should be able to:

1. Learn to properly assess your patients for restricted tongue mobility due to tongue-tie.
2. Identify common compensation patterns that may develop secondary to restricted tongue mobility.
3. Appreciate a multidisciplinary approach to treatment that includes frenum surgery, myofunctional therapy and fascia physical therapy.

12:00 pm – 1:30 pm

LUNCH IN THE EXHIBIT HALL

All registrants are invited to join us for lunch in the Exhibit Hall.

1:30 pm – 3:00 pm

Addressing Breathing Pattern Disorders and Normalizing Volume for Normal Craniofacial Development and Improved Sleep

Patrick McKeown, MA, Dip BM

This presentation focuses on examining the damaging effects that mouth breathing and excessive breathing volume have on craniofacial development and sleep.

Following the presentation, registrants should be able to:

1. Understand the effect of mouth breathing on health.
2. Identify breathing pattern disorders.
3. Teach exercises to decongest the nose.
4. Teach techniques to establish nasal breathing.
5. Deliver Breathe Light exercise to patients.

Main Scientific Session Agenda | continued

3:00 pm – 3:30 pm

BREAK IN THE EXHIBIT HALL

3:30 pm – 5:00 pm

The Integrative Treatment Model: The Future of Orofacial Health

Kelly Hibler Wells, DC

Everyone wants a beautiful smile.

- What gets in the way of developing a balanced face?
- Can future problems be identified before a child loses their first tooth?
- How can these issues be corrected, especially in young children?

In order to guide patients on a proven path to avoiding future health problems, we must look at them through a different lens. No longer can we focus only on the teeth or the TMJ, we must now consider the body as a whole and address the root causes of dysfunction and atypical development. The healthcare professional of today has an opportunity to have a positive life-long impact by embracing an integrative approach.

This session will help the practitioner understand:

- 1.** The underlying growth and development problems behind malocclusion.
- 2.** What is an “integrative” approach.
- 3.** The role of Cranio-Dental Co-treatment.
- 4.** How Cranial Adjusting is different from CST.
- 5.** How to find an integrative professional partner.

5:00 pm – 6:00 pm

CONVOCAATION

6:00 pm – 7:30 pm

**PRESIDENT'S RECEPTION
IN THE EXHIBIT HALL**

SATURDAY | JULY 21

6:45 am – 8:00 am

DIPLOMATE BREAKFAST

Open to all ABCP and ABCDSM Diplomates.

▶ *You MUST pre-register for this Diplomat Breakfast using the Symposium Registration Form at the back of this brochure.)*

7:00 am – 8:00 am

REGISTRATION AND CONTINENTAL BREAKFAST

NOTE: New Members Breakfast, Womens Breakfast (**MEMBERS ONLY**) and Neuromuscular Dentistry Breakfast all take place this morning as well.

8:00 am – 10:00 am

Sympathetic Nerve Dysfunction in the Maxillofacial Region

Mark A. Piper, DMD, MD

Complex Regional Pain Syndromes (CRPS-1 and -2) in the head and neck are frequently misdiagnosed and poorly understood by dentists and physicians. Topics will include physiology of sympathetic nerve dysfunction in allodynia, mandibular dystonia, trismus, and dental pulpal compartment syndrome. Overview of spread of CRPS to the extremities, diagnostic nerve blocks, and treatment options will be detailed.

Learning Objectives:

- 1.** Understand the anatomy and physiology of the sympathetic nervous system.
- 2.** Recognize the diagnostic criteria for CRPS-1 in the head and neck region.
- 3.** Know when patients have Sympathetic-Induced Dystonia of Occlusion.
- 4.** Differentiate CRPS-1 from cervical and trigeminal afferent sensory pain.
- 5.** Learn about diagnostic nerve blocks and pharmacologic management for CRPS-1.

10:00 am – 10:30 am

Break in the Exhibit Hall

Main Scientific Session Agenda | continued

10:30 am – 12:30 pm

FDH and Neural Occlusion Screening Program Analysis

Nick C. Yiannios, DDS

The Frictional Dental Hypersensitivity (FDH) concept was recently presented to the dental profession by Dr. Nick Yiannios, a private dental practitioner, author, lecturer, and founder of the Center for Neural Occlusion (CNO). Certain types of digitally measured occlusal and orthopedic events are positively correlated with a heightened sensitivity to cold, in so much that a digitally guided reduction of aberrant occlusal excursive interferences has been found to statistically decrease a patients' sensitivity to cold the vast majority of the time. Dr. Yiannios' research and practical clinical implementation of his Neural Occlusion screening protocols suggests that there are neurological explanations that involve not only trigeminal inputs, but autonomic sympathetic inputs arising from periodontal and intrapulpal nerve fibers as well. The practical applications of this lecture are enormous, empowering the practitioner with knowledge to more definitively control untoward and confounding restorative and TMD pains. Dr. Yiannios routinely uses T-Scan digital occlusal analysis slaved to EMG to accomplish precise and digitally directed occlusal outcomes after using MRI and CBCT imaging to understand how the patients' bilateral orthopedic TMJ condition influences their occlusions.

Learning Objectives:

1. Understanding the relationship between aberrant occlusal interferences often relate to cold sensitivity (tooth allodynia) in the dental patient
2. An introduction to how the patients' orthopedic TMJ condition may readily alter and influence their occlusion
3. An introduction to the concept of implementing a Measured Anterior Guidance Development in appropriate patients using digital metrics to guide the way
4. The importance of TMJ imaging and how it relates to occlusion
5. The importance of timing, force, and muscular activity and how it relates to a patients' comfort, or lack thereof

6. An introduction to the Neural Occlusion screening protocols
7. Understanding why "Measured Matters" regarding the excellent practice of dental medicine.

12:30 pm – 2:00 pm

BOX LUNCH AND MEMBERSHIP MEETING FOR AACP MEMBERS

Lunch on your own for all others

2:00 pm – 3:30 pm

From Dentistry to Medicine

Steven R. Olmos, DDS

Dr. Olmos will review the evolution of dental pathology and dental perspectives historically in the treatment of chronic face and jaw pain to our present day understanding of their comorbidity with medical and functional breathing pathology from the medical perspective. Dentists historically have treated the symptoms of dysfunction without identifying or treating the origin. He will answer the question: "Does grinding the teeth (equilibration) resolve a patients' grinding of their teeth?"

3:30 pm – 4:00 pm

BREAK IN THE EXHIBIT HALL

4:00 pm – 5:00 pm

Point/Counterpoint: A Panel Discussion of Treatment Protocols and Philosophies

Mark A. Piper, DMD, MD

Nick C. Yiannios, DDS

Steven R. Olmos, DDS

This will prove to be a 2018 Symposium highlight as three of our presenters debate a number of treatment protocols and treatment philosophies. This discussion is so important that we will be ending all of our ancillary programs early so those participants can join us in the main scientific hall to listen and learn.

5:00 pm

SYMPOSIUM ADJOURNS

Fundamentals of Craniofacial Pain & Sleep Therapy: Back to Basics

Who Should Attend?

An ideal primer, this program is designed for dentists who are new to craniofacial pain and sleep breathing disorders, and for doctors seeking information to aid them in making appropriate referrals.

Objective

This course introduces fundamental principles of diagnosis and treatment of craniofacial pain and sleep breathing disorders designed for dentists new to the field and those that would like to refresh their knowledge base. It is also ideal preparation for dentists who wish to enroll in the AACP Institute's Craniofacial Pain Mini-Residency program.

NOTE: All sessions printed below in **BLUE INK** will take place in the **MAIN SCIENTIFIC HALL**. You will return to the Fundamentals Program session room for all other sessions.

FRIDAY | JULY 20

7:00 am – 8:00 am

REGISTRATION AND CONTINENTAL BREAKFAST

8:00 am – 8:15 am

Certified Craniofacial Pain & Sleep Therapy Auxiliary Program, Part 1

Course Objective

The first part of a two-part program, the **AACP's Certified Auxiliary Program, Part I**, course is designed to establish a foundation for dental staff who are tasked with meeting the needs of craniofacial pain and sleep disordered breathing patients. Attendees will gain clinically relevant knowledge and skills—all of which are essential for success in a craniofacial pain and sleep disordered breathing practice.

CTA, Part II

Part II of this program will be provided ONLINE. Details will be sent to all completing **Part I**.

Earn Your Certification

Qualifications for the CTA certificate include:

- TWO years' experience in the medical/dental field
- MANDATORY attendance at all classes in **Part I** and **Part II** of this course
- A VALID CPR certificate
- A PASSING grade on the final exam

FRIDAY | JULY 20

7:00 am – 8:00 am

REGISTRATION AND CONTINENTAL BREAKFAST

8:00 am – 8:15 am

OPENING REMARKS

Steven R. Olmos, DDS, AACP President

8:30 am – 10:00 am

Anatomy, Neurology, Pathology

Chase Bennett, DDS

Chase Bennett, DDS, will discuss basic principles of anatomy, neurology and pathology that are essential in the assessment, diagnosis, and management of craniofacial pain and TMD patients.

10:00 am – 10:30 am

BREAK IN THE EXHIBIT HALL

10:30 am – 12:00 pm

Patient Examination & Principles of Diagnosis

Jeffrey S. McCarty, DDS

Jeffrey S. McCarty, DDS, will present a detailed step-by-step protocol for clinical evaluation to obtain a different diagnosis.

12:00 pm -1:30 pm

LUNCH IN THE EXHIBIT HALL

All registrants are invited to join us for lunch in the Exhibit Hall.

1:30 pm – 3:00 pm

Dental Sleep Medicine

Bryan Baker, DDS

Bryan Baker, DDS will examine basic principles of dental sleep medicine.

3:00 pm – 3:30 pm

BREAK IN THE EXHIBIT HALL

3:30 pm – 4:30 pm

Pharmacology

Mayoor Patel, DDS

Mayoor Patel, DDS, will review in detail pharmacological principles for patients with temporomandibular disorder.

4:30 pm – 5:00 pm

Insurance and Billing Basics for the Sleep Office

Rose Nierman, RDH

Rose Nierman, RDH, will discuss circumstances in which patients in the Dental Sleep practice may be entitled to benefits under their medical or dental insurance plans. She'll also share information to assist doctors and their patients in maximizing reimbursements.

5:00 pm – 6:00 pm

CONVOCATION

6:00 pm – 7:30 pm

**PRESIDENT'S RECEPTION
IN THE EXHIBIT HALL**

Certified Craniofacial Pain & Sleep Therapy Auxiliary Program, Part 1 | continued

SATURDAY | JULY 21

7:00 am – 8:00 am

REGISTRATION AND CONTINENTAL BREAKFAST

8:00 am – 9:30 am

Radiology

Terry Bennett, DMD

Terry Bennett DMD will discuss the various types of imaging used in the diagnosis of TMD patients, highlighting specifically CBCT imaging.

9:30 am – 10:00 am

Insurance and Billing Basics for the TMD Office

Rose Nierman, RDH

Rose Nierman, RDH, will discuss circumstances in which patients in the TMD/ craniofacial pain practice may be entitled to benefits under their medical and dental insurance plans. She'll also share information to assist doctors and their patients in maximizing reimbursements.

10:00 am – 10:30 am

BREAK IN THE EXHIBIT HALL

10:30 am – 12:00 pm

Pediatric Development and Tongue Tie

James Bieneman, DDS

James Bieneman, DDS, will review the development of airways in pediatrics and review the disruptions caused by tongue ties in afflicted children and how early treatment leads to dramatic changes for these children.

12:30 pm – 2:00 pm

BOX LUNCH AND MEMBERSHIP MEETING FOR AACP MEMBERS

Lunch on your own for all others

2:00 pm – 3:30 pm

The Truth about TMJ & Sleep Appliances and Record Taking

Sonnie Bocala

Sonnie Bocala has developed and operated multiple labs and will review, without bias, different TMJ and Sleep Appliances and the pitfalls Drs. and Staff can get into without having proper knowledge. He will also educate on proper records taking to insure correct communication and great relationships between the office and lab to insure smooth delivery and treatment for the patient and yourself.

3:30 pm – 4:00 pm

BREAK IN THE EXHIBIT HALL

4:00 pm – 5:00 pm

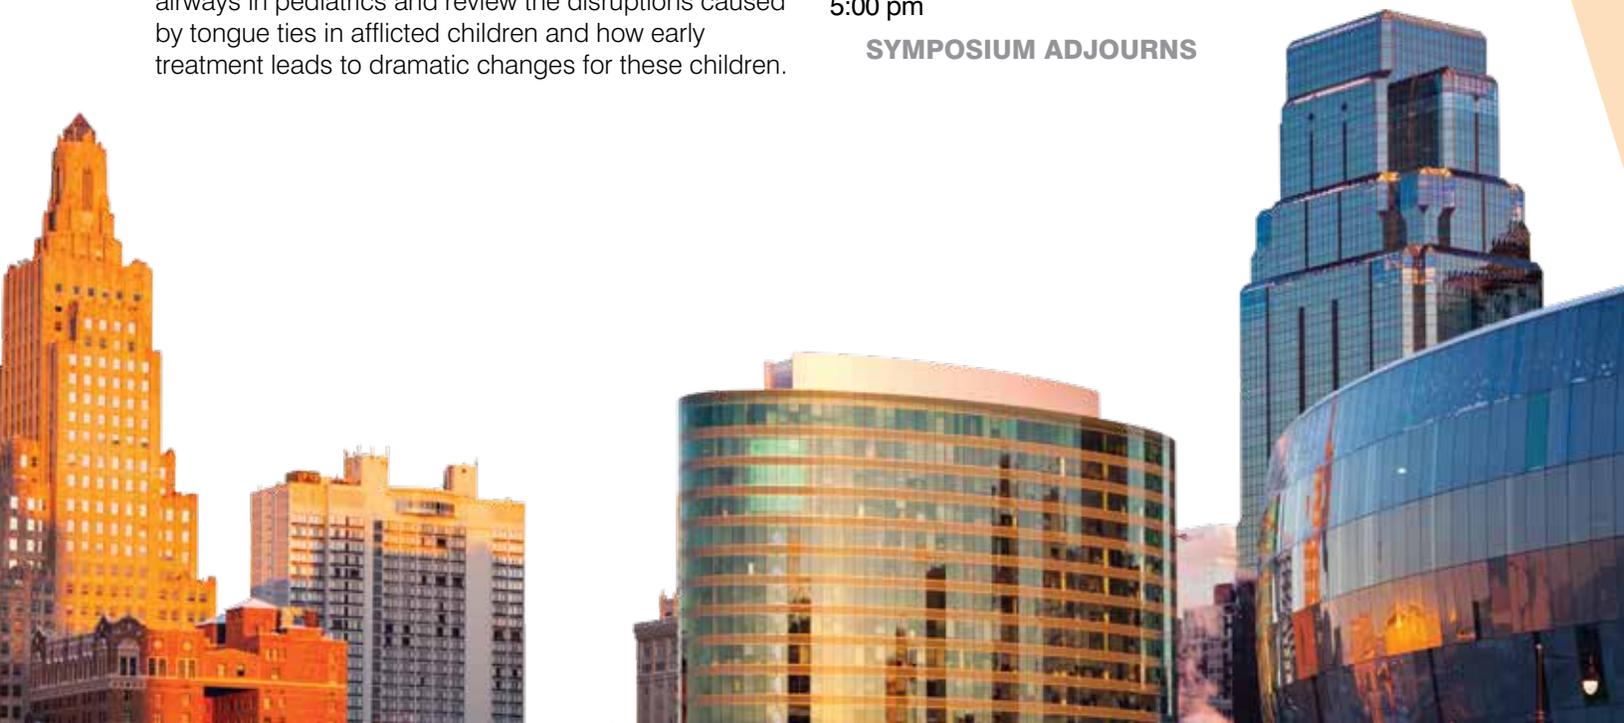

Nutrition & Essential Oils for the Chronic Pain/Sleep Patient

Jean Bennett

Jean Bennett will review how nutrition affects chronic pain and sleep patients along with how to use varying techniques such as essential oils to raise the level of success.

5:00 pm

SYMPOSIUM ADJOURNS

Advanced Auxiliary Program

FRIDAY | JULY 20

7:00 am – 8:00 am

REGISTRATION AND CONTINENTAL BREAKFAST

8:00 am – 8:15 am

OPENING REMARKS

Steven R. Olmos, DDS, AACP President

8:15 am – 10:00 am

Connecting Airways and TMD

Lynn Lipskis, DDS

The co-morbidity of airway issues and craniofacial pain will be discussed, along with causalities, signs and symptoms, and treatment options.

10:00 am – 10:30 am

BREAK IN THE EXHIBIT HALL

10:30 am – 12:00 noon

Biostimulating Lasers in Treatment of Craniofacial Pain and Airway Patients

Joe Baba, DDS

How biostimulating lasers are essential treatment adjuncts in therapy, and an introduction into how they work. This is treatment generally delegated to staff, under the license of a doctor.

12:00 pm – 1:30 pm

LUNCH IN THE EXHIBIT HALL

All registrants are invited to join us for lunch in the Exhibit Hall.

1:30 pm – 3:00 pm

Oral Restrictions: What's the Connection between Tethered Oral Tissues (TOTS) and Orofacial Myology Disorders, TMD and Airway?

Karen Wuertz, DDS

Oral restrictions can affect people of all ages and at all stages of growth and development. A system of identification will be presented, along with treatment options and current therapy trends to restore proper oral function.

3:00 pm – 3:30 pm

BREAK IN THE EXHIBIT HALL

3:30 PM – 5:00 PM

Records for Airway Orthodontics and Craniofacial Pain

Tiffany Monson, CDA, COA

Clear guidelines for taking amazing records will be presented, along with discussion of the significance and use of those records.

Open to all ABCP and ABCDSM Diplomates.

▶ You MUST pre-register for this Diplomat Breakfast using the Symposium Registration Form at the back of this brochure.)

7:00 am – 8:00 am

REGISTRATION AND CONTINENTAL BREAKFAST

NOTE: New Members Breakfast, Womens Breakfast (**MEMBERS ONLY**) and Neuromuscular Dentistry Breakfast all take place this morning as well.

8:00 am – 10:00 am

Appliances and Working with Labs for OSA and Craniofacial Pain

Matt Rago

There are many new options for appliances, along with new digital techniques that can be used for both traditional, and printed appliances. These will be discussed, along with how to provide the lab with all that is needed to insure predictable outcomes, and that excellent treatment specific appliances are delivered to patients.

Advanced Auxiliary Program | continued

10:00 am – 10:30 am

BREAK IN THE EXHIBIT HALL

10:30 am – 12:30 am

Integrative Care for Developing Airways and Improving Health

Kelly Wells, DC

Dr. Wells' background includes chiropractic, pediatric neurology, cranial evaluation and therapy, and respiratory physiology, along with being a Certified Oral Myologist. She will present diagnostic and treatment paradigms that will show how to reveal and treat disturbed breathing, growth and developmental issues, including proper development of the brain and neural pathways, and how to improve health and cognitive function, especially in children.

12:30 pm – 2:00 pm

BOX LUNCH AND MEMBERSHIP MEETING FOR AACP MEMBERS

Lunch on your own for all others

2:00 pm – 3:30 pm

TMJ and CCI in Hypermobile and EDS Patients

John Mitakides, DDS

3:30 pm – 4:00 pm

BREAK IN THE EXHIBIT HALL

4:00 pm – 5:00 pm

Point/Counterpoint: A Panel Discussion of Treatment Protocols and Philosophies

Mark A. Piper, DMD, MD

Nick C. Yiannios, DDS

Steven R. Olmos, DDS

This will prove to be a 2018 Symposium highlight as three of our presenters debate a number of treatment protocols and treatment philosophies. This discussion is so important that we will be ending all of our ancillary programs early so those participants can join us in the main scientific hall to listen and learn.

5:00 pm

SYMPOSIUM ADJOURNS

To make your hotel reservations, please go to:

<https://www.starwoodmeeting.com/events/start.action?id=1708156785&key=3531B98A>

OR call the hotel at (888) 627-8538 and be sure to mention the AACP Symposium.

KANSAS CITY— "Midwestern Charm with Urban Panache"

Known for its gorgeous fountains, world-class barbeque and sensual jazz music, Kansas City melds Midwestern charm with urban panache.

The Westin Kansas City at Crown Center places travelers in the center of it all, offering seamless access to the array of exciting things to do in downtown and beyond. Discover the variety of activities and local points of interest located near our hotel.

Discover an exceptional selection of shops and restaurants at Country Club Plaza, Kansas City's premier retail destination. The Westin Kansas City at Crown Center places hotel guests near "the Plaza," affording them unbeatable access to stores like Sephora, Tiffany & Co., Lululemon, J.Crew and Coach, plus an array of superb restaurants.

The hotel's guest rooms have been NEWLY RENOVATED in the spring of 2018. They feature cool, calming tones which make for a relaxing stay while offering the perfect backdrop for the artwork which is being sourced from local artisans and the Hallmark Collection.

Featuring the latest in design and local touches, our transformed guest rooms are sure to wow you. New guestroom amenities include 55 inch TV's, refrigerators and ergonomic workstations, giving you no need to even leave your guest room.

Staff Discounts

Doctors who wish to register their staff to attend any of the programs may do so by paying 100% tuition for their **first 6** staff members and 50% tuition for up to **4 additional** staff members from a single practice. This payment structure starts over again with the 11th assistant from the same practice.

Not an AACP Member?

Tuition savings is one of many benefits of being an AACP member. If you are not an AACP member, and you submit a completed membership application along with your Symposium registration, you will receive the AACP member registration rate.

To request your AACP membership application, please call us at: **800.322.8651** OR send e-mail to central@aacfp.org

Ways to Register

Send Completed Form with Payment Via:

1. ONLINE — Visit: www.aacfp.org

Under events calendar, look for the link to the AACP 33rd Annual International Clinical Symposium. There, you will find a Registration Form to complete.

2. E-MAIL — Send form with credit card payment information to: central@aacfp.org

3. MAIL — Send form with check OR credit card information to:
AACP | 11130 Sunrise Valley Drive | Suite 350 | Reston, VA 20191

4. FAX — (Credit card payment only) to: 703.435.4390

Acceptable Forms of Payment

- **CHECKS** are acceptable when registration is submitted by mail or completed on-site at the symposium. Checks must be payable to AACP, in **US dollars** and drawn on a **US bank**.
- **CREDIT CARDS** may be used for registrations that are completed online, mailed, faxed, sent by e-mail or completed on-site at the Symposium. AACP accepts VISA and MasterCard only. *AACP reserves the right to charge the correct tuition amount if different from your calculated total.*

Refund Policies

- **Registration** refunds (less 10% of the TOTAL cost of the program) must be submitted in writing by **June 11**. *No refunds will be provided after that date.*
- **Room** reservations at the Westin Kansas City at Crown Center in Kansas City, Missouri: Should you need to cancel this reservation, your individual deposit is refundable if notice is received at least **three (3) days** prior to arrival and a cancellation number is obtained.

Guest Room Reservatons

HOTEL Westin Kansas City at Crown Center

PHONE 888.627.8538 and ask for the AACP room block.

ONLINE To make your hotel reservations, please go to:

American Academy of Craniofacial Pain
11130 Sunrise Valley Drive, Suite 350
Reston, VA 20191

WHO WE ARE—Founded in 1985, the American Academy of Craniofacial Pain is the largest professional organization for those interested in the assessment, diagnosis and management of patients who suffer from craniofacial pain, temporomandibular disorders and sleep disorders in dentistry.

The Goals of the AACFP are:

- To elevate and enhance the professional standards of diagnosis and treatment in the field of Craniofacial Pain and TMD
- To encourage research and further study
- To recognize for the benefit of the public those professionals who have specialized knowledge and skills in diagnosis and treatment
- To promote and improve professional levels of competency
- To encourage the highest standards of excellence for practitioners.

AACFP is an ADA CERP-Recognized Provider, January 1993 to December 2018.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA

CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.
