

The AACCP presents an **ALL-NEW**, two-day continuing education course to help you grow your practice revenues...

Obstructive Sleep Disordered Breathing in Children—An Interdisciplinary Approach

January 31-February 1, 2020

The Palmer House Hilton | Chicago, Illinois

The American Academy of Craniofacial Pain is proud to present, in partnership with **Dr. Kevin Boyd** and **Dr. Darius Loghmanee** (pediatric sleep specialists in dentistry and medicine respectively), a three-session course on Obstructive Sleep Disordered Breathing in Children—an Interdisciplinary Approach.

Each two-day session consists of training in the Chicago area. Sessions will be scheduled a couple of months apart to allow for ease of scheduling for our registrants.

Session 1 is accepting registrants NOW!

Use this brochure to reserve your spot today!

Session 1 is the overview of pediatric sleep breathing from the perspective of how to establish real working communications between the pediatric sleep physician, dentist, the young patient, and parents for delivery in your office. This session is great for both the novice and the experienced clinician in treating sleep breathing disorders in children.

Sessions 2 and 3 will consist of lecture with a greater devotion of time to live demonstration. These two sessions will be in a clinical setting and will have limited registration, with registrants who attend Session 1 having priority.

15 CE Credits

REGISTRATION FEES:

\$1,995
AACP Members

\$2,395
Non-Members

There are so many courses for treating adults, and so few for treating children. We have the best results when we treat these disorders early in a patient's life.

Please don't miss this opportunity!

Obstructive Sleep Disordered Breathing in Children—An Interdisciplinary Approach

Topics to be covered...

- Evolutionary Biology: Dentistry's Most Basic Science
- Fundamentals of Sleep
- Obstructive Sleep Disordered Breathing
- Interdisciplinary Treatment of a 2-1/2-year-old
- Building a Learning Network
- Dental Evaluation of the Pediatric Craniofacial-Respiratory Complex: Risk assessment Tools and Approaches, Diagnosis, Tx Planning for Parents and Other Health Care Professionals
- Building Collaborations Across Disciplines
- The Role of Orofacial Myofunctional Therapy
- Case Reviews: Outcomes from Airway Optimization

Your Instructors ...

- **Kevin Boyd, DDS, MSc**, is a board-certified pediatric dentist practicing in Chicago. He is also an attending instructor in the residency-training program in Pediatric Dentistry at Lurie Children's Hospital where he additionally serves as a dental consultant to the Sleep Medicine service. He is currently a visiting Scholar at the University of Pennsylvania doing research in the areas of anthropology and orthodontics.
- **Darius Loghmanee, MD**, is the Director of the Advocate Children's Sleep Network at Advocate Children's Hospital. He did his postgraduate training at Rush University Medical Center where he completed a combined residency in Internal Medicine and Pediatrics and trained as a fellow in the Sleep Disorders Center. After his training he spent seven years at the Ann and Robert H. Lurie Children's Hospital of Chicago where he evaluated and treated children with control of breathing and sleep disorders. He was then recruited to the Advocate Medical Group to build the first population sleep health service line.

Program

FRIDAY, JANUARY 31, 2020

7:30 am – 8:00 am REGISTRATION

8:00 am – 10:00 am
