

AACP Institute

Intraoral Orthotics for the Management of Temporomandibular Disorders | **CLASS 4**

October 5-7, 2017 | Limited Enrollment!

Only 24 doctors and their key staff members will be registered. Call 800.322.8651 or FAX the enclosed Registration Form today!

Now you and a key auxiliary from your staff can train together for three days to learn how to make your own splints in-house. If you're already making your own appliances, this course will bring you up-to-date on the latest techniques. About 75% of class time will be spent working with hands-on appliance construction.

DoubleTree by Hilton Hotel Dallas-DFW Airport North
Irving, Texas

“*This TMD and Occlusal splints course brought it all together! A solid in depth review of classic and innovative splint therapy modalities for acute and chronic TMD by very experienced clinical based practitioners! Various occlusal evidence based philosophies were delved into and the Hands-on portion fantastic! Immediate take home value for appliance fabrication know-how!***”**

Dr. Greg Larson
San Francisco, California

“*One of the biggest hurdles we faced in the treatment of our TMD patients was the lag time that it takes to get back appliances from the outside labs. After taking this course we can now provide these services the same day that our patients present in our office with a problem. A great benefit to our patients as well as our bottom line. Additionally, I can now delegate much of this fabrication to my assistant who also attended. I would recommend this course to anyone who treats TMD patients.***”**

Dr. Jeff Chantry
Elk Grove, California

Dear Colleague,

We would like to invite you to join us in the newest of the Institute's constantly evolving curriculum: ***“Intraoral Orthotics for the Management of Temporomandibular Disorders”***.

The treatment of TMD frequently requires employment of Intraoral Orthotics (splints) in the management. The doctor is faced with the decision to send the case to a lab or to make the Orthotics in office. The first choice requires a hefty lab fee and waiting for an extended period of time to get the appliances back. The second requires training and time. Often the doctor has neither of these and does not have an auxiliary who does as well.

This is where the Institute can help. We will train you and a key auxiliary a variety of techniques to fabricate a variety of appliances. You and your staff member will learn how to complete appliances for muscle disorders, TMJ issues and appliances to address parafunctional activity.

This course will be intensive and heavily weighted to hands on exercises where you will actually fabricate appliances on each other. In fact, 75% of your time will be spent working with hands on appliance construction.

So if you are sending appliance out keep the construction process in house and make it an income center for your practice. You will improve your bottom line but more importantly you improve the level of service to your patients by speeding the delivery time and having complete quality control over the finished product.

If you wish to learn how to make appliances or are currently making them and want to learn new ways of completing the process, this course is for you.

This program is strictly limited to 24 doctors and staff so do not delay, register NOW!

Best Wishes,

Terry R. Bennett, DMD
Institute Director

Intraoral Orthotics for the Management of Temporomandibular Disorders

CLASS 4 | October 5-7, 2017

Join Us for this Comprehensive Program

DAY 1

- › Introduction to Intraoral Orthotics
- › Muscle Disorders Encountered with TMD
- › Appliances for Muscle Disorders
(Lecture and Workshop)
 - Anterior Deprogrammers
 - CR (Shore, Superior Repositioning) Appliance
 - Rest Position (Ricketts) Appliance
 - Pain Release Splint

DAY 2

- › Disc Interference Disorders Encountered with TMD
- › Appliances for Disc Interference Disorders
(Lecture and Workshop)

DAY 3

- › Disc Reduction Technique or Unlocking the Joint
- › Intra-articular Injection of the TMJ
- › Post Unlocking Appliances
(Lecture and Workshop)
- › Summing it Up/Questions and Answers

“Great course! Wish I would have had this one ten years ago. It filled in a lot of the blanks for me in my protocol of treatment. I came home with more confidence in finishing my cases as well as new information on making and “tweaking” existing appliances.

Thank you, all of you, for sharing your time, expertise and friendship at this exceptional course. It really is great that there are still Docs out there who are willing to share what they have learned through the years with others.”

Dr. John Callister
Payson, Utah

“The hands on splint course was just what I needed to put everything I've learned so far about treating TMD into practice. This course increased my confidence and ability to carry out successful splint therapy for my patients. Bringing my assistant proved to be invaluable. We now can save on lab fees and splint delivery time by being able to fabricate appliances in office. The instructors were very knowledgeable and helpful in all aspects the learning process. My assistant and I brought back completed splints and step by step guidelines for fabrication, as well as patient therapy protocols. This course is excellent for the general dentist ready to increase craniofacial pain therapy in their practice!”

Dr. Melody Stampe
Richardson, Texas
