Gain the knowledge and clinical skills required to assess, differentially diagnose and effectively treat the majority of Craniofacial Pain patients seen in dental practice today while making progress toward fulfilling AACP Fellowship and AGD Mastership requirements.

Learn from the Experts at AACP!

SESSION 1: Craniofacial Pain Disorders, History, Examination, Diagnosis & Treatment Planning

SESSION 2: Treatment & Management of the Patient with a Craniofacial Pain Disorder

SESSION 3: Physical Medicine Modalities, Occlusion, Pharmacology & Electro-Diagnostic Modalities in the Management of the Craniofacial Pain Patient

SESSION 4: Phase II Orthodontic Finishing, Sleep Disorders, Alternative Therapies: Their Relationship to the Craniofacial Pain Patient

AACP INSTITUTE
CRANIOFACIAL PAIN MINI-RESIDENCY

Lectures • Hands-On Workshops • Case Review • Case Presentation

Gerald J. Murphy, BS, DDS – Director
Dear Colleague:

Welcome! On behalf of the AACP Institute faculty, I extend a personal invitation to you to participate in our Craniofacial Pain Mini-Residency program. This uniquely comprehensive, evidence-based learning experience covers Craniofacial Pain and Temporomandibular Disorders from “A to Z.” Equally important, it is 100% endorsed by the American Academy of Craniofacial Pain, which is the largest professional organization in dentistry today devoted exclusively to those interested in this exceptionally rewarding area of clinical practice.

If you are new to this area of dentistry, this Craniofacial Pain Mini Residency will provide a firm foundation of didactic and clinical information that you can use to add assessment, diagnosis and treatment of Craniofacial Pain and TMD to your practice. For the experienced clinician, this 4-session program offers a logically formatted sequence of learning that will better enable you to categorize existing knowledge, information and experience.

Because the Craniofacial Pain Mini Residency combines lecture, participation and case presentation, it is perfect for any doctor seeking continuing education hours to help fulfill requirements for AACP Fellowship. It is also ideal for doctors on the AGD Mastership track, where both lecture and participation requirements exist.

I urge you to carefully inspect this informational brochure and make plans now to join us for a worldclass learning experience plus fun, fellowship and camaraderie. Whether your ultimate desire is to focus your practice exclusively in the area of Craniofacial Pain and TMD, augment your general dentistry practice, or simply make better patient referrals, I am 100% confident this program will fulfill your needs.

Gerald J. Murphy, B.S., D.D.S.  
Director, AACP Institute

P.S. Act quickly! Enrollment is limited!

---

“I have taken many classes in the field of TMD but I usually felt like I had only part of the story. The information in this class is organized in such a way that it will help me put everything together from the initial consultation, diagnosis and treatment plan, to providing non-surgical options of treatment and follow up.”

John Van der Werff, DDS  
Redding, CA

---

PROGRAM BENEFITS

- Enrollment is limited to ensure quality instruction, with priority registration given to dentists who register to attend the entire, 4-session program.
- Passing grades on all 4 exams offered in conjunction with this program satisfy AACP Fellowship written exam requirements; case presentation and review prepares qualified candidates for the oral portion of the AACP Fellowship exam.
- Curriculum and session content is evidence-based and 100% approved and endorsed by the American Academy of Craniofacial Pain, resulting in a superior learning experience.

TEACHING/LEARNING METHODOLOGIES

- Lecture and participation is included in every session, with emphasis on clinically relevant knowledge and skills.
- Case review and case presentation experiences encourage development of a logical framework you can use to approach patients (and complete oral case defenses required for tier advancement in AACP and other organizations).
- Stand-alone sessions enable you to enroll in the entire mini-residency program or attend individual sessions based on your schedule and personal interests.

CONTINUING EDUCATION CREDITS

Participants in this 4-session Craniofacial Pain Mini-Residency program have the opportunity to earn approximately 95.25 CE credits (56.00 lecture, 39.25 participation).

END-OF-SESSION EXAMINATIONS

Fellowship in the AACP is available to AACP members only. Dentists wishing to test for Fellowship in the AACP will take four individual written examinations. The examination covering Session 1 will be given the evening prior to the start of Session 2; the Session 2 examination will be given the evening prior to the start of Session 3. The Session 3 exam will be given the evening prior to the start of Session 4. Session 4 testing may be completed by mail utilizing a designated proctor prior to the AACP Summer Symposium or completed the day prior to the start of this summer meeting. Participation in the examination portion of the Craniofacial Pain Mini-Residency program is optional and at the discretion of each participant.

For session dates & location, tuition, hotel, and registration information, see pages 8-11.

American Academy Of Craniofacial Pain

Leading the TMD Community • www.aacfp.org

VISION:

The AACP will continue to be the Craniofacial Pain/TMD organization representing all practitioners in this discipline by providing a common ground for advancement of knowledge, clinical practice and research.

MISSION:

The American Academy of Craniofacial Pain is committed to the relief of craniofacial pain and dysfunction and the advancement of research in this field.
Session 1
Craniofacial Pain Disorders,
History, Examination, Diagnosis & Treatment Planning

"The amount of information gained was immense. Many mysteries were cleared up and new paradigms were formed. I cannot wait until Session 2."

Stephen J. Keller, DMD
San Jose, CA

OBJECTIVES:
Upon completion of Session 1, participants should be able to:

1. Recognize the most commonly occurring craniofacial pain disorders
2. Complete a comprehensive history and examination of the craniofacial pain patient
3. Understand the more commonly used diagnostic tests and when to implement them
4. Make a provisional diagnosis based on patient complaints

By the end of Session 1, participants should also have acquired, improved and/or updated their knowledge of and ability to: understand the clinical relevance of head and neck anatomy, recognize and diagnose dental-alveolar pains, and develop a treatment plan for the craniofacial pain patient.

APPROXIMATE CE HOURS: 22.00 (16.00 lecture, 6.00 participation)
Session 2
Treatment & Management of the Patient with a Craniofacial Pain Disorder

"What can be said about any activity that affirms our hopes for the future? The value of such fine education is truly a bargain. I am excited that I am experiencing this at my 30th year of practice."

Paul F. Mitsch, DMD
Augusta, KS

OBJECTIVES:
Upon completion of Session 2, participants should be able to:

1. Treat and manage the myofascial pain disorder patient
2. Treat and manage patients with intra-articular pathology of the TMJ
3. Treat and manage craniofacial pain syndromes

By the end of Session 2, participants should also have acquired, improved and/or updated their knowledge of intraoral orthotics (e.g., types, designs, fabrications and management) and their ability to: deliver trigger point injections, deliver intra-articular injections, and manipulate the TMJ to reduce a non-reducing disc displacement.

APPROXIMATE CE HOURS: 23.50 (10.00 lecture, 13.50 participation)

DAY 1
Welcome & Session Overview
Case Reports & Discussion
Head & Neck Anatomy as it Relates to TMD, Muscle Disorders & Craniofacial Pain Disorders
Anatomy Lab with Dissected Specimens
Overview of Muscle Disorders
Appliances (Splints) for Muscle Disorders
Occlusal Registration Workshop
Myofascial Pain Disorders: Introduction to Spray & Stretch

DAY 2
Spray & Stretch Technique Workshop
Introduction to Trigger Point Injections
Trigger Point Injection Workshop
The NTI Appliance
Pathology/Disease Process of TM Joints
TM Joint Injection Techniques
TM Joint Injection Workshop
Non-Reducing Disc Displacement Reduction Technique & Temporary Appliance Fabrication
Appliances for Disc Interference Disorders: Types, Occlusal Registration, Fabrication & Management

DAY 3
Temporary Splint Fabrication Workshop for Non-Reducing Disc Displacements, NTI Fabrication Workshop
Common Craniofacial Pain Disorders
Craniofacial Pain Disorder Diagnostic & Therapeutic Injections Workshop
Practice Management Discussion
Discussion of Case Presentation & Overview of Session 3
Testing & Review

800/322-8651
### Session 3
Physical Medicine Modalities, Occlusion, Pharmacology & Electro-Diagnostic Modalities in the Management of the Craniofacial Pain Patient

**OBJECTIVES:**

**Upon completion of Session 3, participants should be able to:**

1. Prescribe the physical medicine modalities that best complement and enhance the treatment objectives
2. Understand principles of occlusion to develop ideal occlusal patterns for treatment orthotics and phase II prosthetic finishing
3. Evaluate the necessity for pharmacologic management of the craniofacial pain patient
4. Apply electro-diagnostic instrumentation in the evaluation of the craniofacial pain patient

By the end of Session 3, participants should also have acquired, improved and/or updated their knowledge of and ability to: administer physical medicine modalities in a clinical setting; understand when prosthetic finishing is required and the best approach to satisfy patient needs; understand what medications patients may present with and how these medications may adversely affect pain patterns; appreciate when, why and what medications to prescribe; understand the reasons for local anesthetic failures; appreciate the role of osteocavitation lesions in craniofacial pain disorders; understand the role of percutaneous radio frequency thermoneurolysis in craniofacial pain treatment; secure a neuromuscular occlusal registration to fabricate a neuromuscular orthotic; and organize and prepare a proper case presentation.

**Session 4**
Orthodontics for Phase II Finishing, Sleep Disorders, Alternative Therapies: Their Relationship to the Craniofacial Pain Patient

**OBJECTIVES:**
Upon completion of Session 4, participants should be able to:

1. Determine the best orthodontic approach for phase II finishing
2. Evaluate the craniofacial pain patient for Obstructive Sleep Apnea (OSA)
3. Determine if oral appliance therapy for OSA is indicated and, if so, the type of appliance to prescribe
4. Understand the role of alternative therapies in the management of the craniofacial pain patient

By the end of Session 4, participants should also have acquired, improved and/or updated their knowledge of and ability to: use cephalometric analysis in orthodontic care of the extracapsular and intracapsular TMD patient plus orthodontic care to improve the airway; understand growth and development of the craniofacial complex; determine the timing for orthodontic treatment to correct craniofacial development problems; use diagnostic instrumentation for OSA; and appreciate what types of alternative therapies might best complement traditional therapeutic techniques.

**APPROXIMATE CE HOURS: 25.75 (15.50 lecture, 10.25 participation)**

### JOIN AACFP & SAVE

Tuition savings is one of many benefits of being an AACP member. To qualify, simply submit a completed AACP membership application (with processing fee) with your Craniofacial Pain Mini-Residency program registration.

To request your membership application, call AACP at 800/322-8651.

[www.aacfp.org](http://www.aacfp.org)
Hotel Accommodations

All four (4) sessions of this mini-residency program will take place at the American Airlines Training & Conference Center (AATCC).

For guest room reservations, call 800/777-6464.

PACKAGE RATE (with guest room)

$179.00 (plus tax) per person/per day
including overnight accommodations, round-trip shuttle transportation from DFW International Airport to the AATCC, continental breakfast, all-day break service, lunch and dinner buffets, plus unlimited use of the facilities.

The above room rate is inclusive of guest service fees and service charges applicable to guest rooms and group functions. Lunch and dinner buffets plus gratuities for bell staff and housekeeping; in-room coffee; plus unlimited use of the fitness center, heated swimming pool, tennis, basketball and volleyball facilities are included.

DAY RATE (without guest room)

$89.00 (plus tax) per person/per day
including round-trip shuttle transportation from DFW International Airport to the AATCC, continental breakfast; all-day break service; plus lunch and dinner buffets; excluding overnight accommodations.

The “Day Rate” is applicable to participants in the Craniofacial Pain Mini-Residency program who do not require overnight accommodations. Continental breakfast, all-day break service, plus lunch and dinner buffets are included; taxes and service charges are not included.

CHECK-IN/CHECK-OUT

Guest accommodations will be available at 3:00 pm on arrival day and reserved until 11:00 am on departure day. American Airlines Training & Conference Center would appreciate receiving flight arrival times, if available. Any participant wishing special consideration for late checkout should inquire at the front desk on the day of departure.

GUEST ROOM CHARGES

Craniofacial Pain Mini-Residency program participants will pay their own account upon departure. When reservations are made, a deposit equal to the package or room rate and tax for the night will be required. An individual’s deposit is refundable to the individual if the American Airlines Training & Conference Center receives notice of an individual’s cancellation at least 24 hours prior to scheduled arrival. Upon check-in, each guest will be required to present a valid credit card, on which an amount of sufficient pre-authorization can be obtained to cover the package or room and tax charges and guest fees for the length of the guest’s stay, plus the anticipated use of the American Airlines Training & Conference Center’s ancillary services. Each guest’s home/business address and e-mail address will also be required.

TRANSPORTATION

Complimentary shuttle transportation is available to and from the American Airlines Training & Conference Center and Dallas/Fort Worth International Airport. Complete instructions for calling from the airport will be sent to Craniofacial Pain Mini-Residency registered attendees. If you take a taxi, be sure to tell the driver you wish to go to the American Airlines Training & Conference Center (at Highway 360 and 183) in Fort Worth. If you request American Airlines Center, you may find yourself in Dallas at a sporting event or concert.

*Note: Enrollment is limited. Participants who register for the entire 4-session “Mini-Residency” will receive priority. We advise that you do not make guest room and travel arrangements until you receive confirmation from the AACP Institute that your registration has been accepted.

800/322-8651

AIRFARE SAVINGS

Through special arrangement with the AACP Institute, American Airlines is offering discounts off its published airfares to Craniofacial Pain Mini-Residency program participants. For pricing, assistance with reservations and ticket purchases, contact the American Airlines Service Desk at 800/433-1790. When making reservations for Sessions 1 and 2, be sure to mention our code: A9817SS. For Sessions 3 and 4, mention code: A0528SS.
**Mini-Residency**

**Hurry!** Enrollment is limited and available on a first-come, first-served basis.

**How to Register**

Complete and mail the registration form, with payment, to:

**AACP, 516 W. Pipeline Road, Hurst, TX 76053.**

We also invite you to register online at www.aacfp.org or by phone at 800/322-8651.

Enrollment is limited; participants who register for the entire 4-session “Mini-Residency” will receive priority. Please do not make hotel and travel arrangements until you receive confirmation from the AACP Institute that your registration has been accepted.
